

Big Ghost Deals

EQUIPMENT SUPPORT / GEORGIA, USA / OCTOBER 2026

Help Us Build Our Ghost Board

One laptop. Endless possibilities. Building the future together.

Big Ghost Deals is developing proprietary AI-assisted commercial video software, connecting production workflows with human review. Our conceptual Ghost Board starts with one founder-owned laptop and four empty equipment branches. Only verified arrivals fill a connection.

Development, honestly presented

Historical local technical exports used supplied footage, audio and captions. Foundations include scene planning, assembly, export checks and operator review.

Commercial realism, bilingual narration, repeatability and production costs still need validation. The customer subscription platform is not launched.

Useful equipment - planning targets

Desktops/workstations: 32 GB RAM and 1 TB SSD baseline; 64 GB and 2 TB preferred.
Suitable GPUs, compatible RAM and SSDs.
Development laptops; displays 27 inches or larger.
Working storage, UPS and networking.
GPU/enterprise servers, subject to fit and cost review.

Cloud credits and software access are separate from permanently owned hardware; approval is required before activation.

What equipment could enable

More dependable development, rendering and quality review, plus research into GPU-assisted generation and locally managed inference.

New, refurbished, corporate-surplus, demonstration and open-box equipment are welcome, from components to complete systems. Compatibility and operating costs require review.

Terms and optional recognition

Permanent ownership, delivery costs covered; no purchase, repayment or mandatory return.

No advertising, endorsement, exclusivity, equity, IP rights or promotional work is promised. The owner must approve terms in writing.

Recognition needs separate donor permission and owner approval. We are a for-profit business; no charitable tax deduction is represented.

Equipment and sponsorship inquiries

partnerships@bigghostdeals.com

Include organization, model, condition, quantity, location, delivery and proposed terms.

Big Ghost Deals is a for-profit AI technology business in development. The founder independently started and personally invested in the business. Authentic local interface evidence is identified on our Progress page; no accepted platform demonstration reel is claimed.
